Report on Project - Data Visualization

This data visualization project focused on research data from scientific studies conducted between 1996 and 2014. All requested tasks were completed, with additional innovative elements and extensions beyond the initial requirements. The questions posed were thoroughly addressed, and extra features were incorporated to enrich the final result.

The required assignment was also completed according to the guidelines. The data visualization was created using Tableau, and the following link provides access to the online version:https://public.tableau.com/app/profile/abdessamad.ait.brahim/viz/Histoire1-Analysedelaproductionscientifique/Analysedelaproductionscientifique.

All work sheets have been included in the folder titled "**tableau visualizations**," as instructed.

This project was completed by:

- **Abdessamad Ait Brahim**
- **Ayyoub Amazal**

Program: Big Data and AI
Module: Data Visualization
